Sustainability

April 2016

We are pleased to announce that lawyers from a variety of our practice areas have formally come together in an interdisciplinary

Sustainability Group

With a history of collaborating to counsel clients on sustainable issues, the lawyers in the cross-practice [Sustainability Group](#) offer clients a comprehensive approach to incorporating sustainable designs and practices into their business. They are experienced in matters such as using renewable and alternative energy, recycling and conserving water and other resources, financing green initiatives, following LEED and green construction practices, implementing corporate sustainability programs, managing climate change risks through adaption and mitigation, and establishing clean-tech ventures.
