Leveraging Knowledge to Manage Your Data Risks

CYBERSECURITY

[Threat Groups Using Translation Tools in Phishing Attacks](#)

It used to be that one of the sure ways to identify a phishing email was to notice grammatical errors or broken English in the text of the communication. Thanks to new translation tools like Google Translate, which are available worldwide, threat actors can translate a phishing email into any language, so it sounds authentic to the recipient and pull off a business email compromise attack (BEC) effortlessly.

DATA PRIVACY

[Data Brokers May be Selling Mental Health Data with Minimal Vetting](#)

A [recent study](#) found that some data brokers are selling highly sensitive data relating to consumers' mental health conditions on the open market with minimal vetting of their customers and few controls on how these purchasers use the data. The study, conducted by a researcher at Duke University's Technology Policy Lab, found that 11 out of 37 data brokerage firms contacted by a potential purchaser of the data were willing to sell the requested mental health data with little to no knowledge of the potential use of that data. HIPAA

[Annual Breach Notification Deadline to OCR Looming](#)

HIPAA requires that covered entities notify the Office for Civil Rights (OCR) of any breaches of unsecured protected health information that affects less than 500 individuals in a calendar year within 60 days following the end of the calendar year. [Read more](#)

PRIVACY TIP #357

[ChatGPT is Amazing but Available to Threat Actors Too](#)

ChatGPT is amazing! But all amazing technology has its ups and downs; since it is so amazing, not only do we want to use it, but so do the bad guys. Learn how to protect yourself from threat actors who use artificial intelligence with this week's Privacy Tip.
